REPORT ON FREE HEALTH CAMP

ORGANIZED BY IQAC AND DEPARTMENT OF ZOOLOGY
IN COLLABORATION WITH KINGSTON HOSPITALS

As a service for the community and to educate students on the importance of regular health check-ups, IQAC and department of zoology organized a free health check-up camp with the help of Kingston Hospitals. It was organized on 00-00-0000 at 1:00pm to 6:00pm. Many doctors were present on site and provided facilities such as one to one consultation with the doctors, scanning and blood investigation.

PROGRAM REPORT

Program name : Webinar on Genes and Cellular control.
Date of activity : 24/08/2022
Venue : Online.
Organized by : Department of Zoology.
Number of participants : 75

Objective of the program

The tightly regulated on/off switching of a gene's expression is known as gene regulation. It controls the effective use of cellular resources in single-celled organisms in response to their environment. Gene control determines the cell, its form and function, and ultimately the entire organism in multicellular creatures. When their environment changes, such as in reaction to signals from other cells, cells can alter the pattern of genes they express. The beginning of RNA transcription is typically the most significant point of control for most genes, even if all of the processes involved in the expression of a gene can theoretically be controlled.

Topics Covered:

- Human genetic makeup.
- Types of genes.
- Chromosomal abnormalities.
- Hereditary genetic diseases.
- Gene mutations.
- Gene therapy.

PROGRAM REPORT

Program name : Webinar on Extinction and Evolution.
Date of activity : 23/08/2022
Venue : Online.
Organized by : Department of Zoology.
Number of participants : 82

Objective of the program

Since species extinction is directly related to natural selection, it plays a significant role in the process of evolution. Environmental changes are frequently the cause of extinction. Some species have the adaptations necessary to live through environmental changes and procreate, whereas others do not. Occasionally, over many generations, a species will evolve the essential adaptations if the environment changes slowly enough. From the rise in antibiotic and pesticide resistance to the mostly human-caused increase in the extinction rate, humans have had a significant impact on evolution. Even the evolution of our own species is impacted by our influence on the process of evolution.

Topics Covered:

- Charles Darwin's theory.
- Necessity of extinction.
- Rise of new species.
- Change in habitats.
- Diversity.
- Environmental changes.
- Human disturbances.

The webinar was attended by a large no. of faculty members and students. There was a very enthusiastic participation by the students, which was evident by the number of questions asked. The webinar was conducted virtually using zoom app, link to which was mailed to the mail IDs of all the registered participants an hour before the webinar started. The webinar started at 1:00 PM and lasted till 3:00 PM on 23 August 2022.

This webinar taught the participants about different aspects of Evolution and extinction and why extinction is necessary for a species or a larger group of organisms to evolve.

Outcomes of the Program

There were many students who expressed their desire to present their poetry or that of other poets on stage. Anwar Uloom Education Institutions Director Professor Ahmed Baig praised the students who participated in the Mushaira and also advised them to develop interest in poetry.

Feedback on the mushaira of female students:

The success of this mushaira can be attributed to the fact that apart from all the guests of honor and special guests sitting on the stage, the students also appealed to hold a mushaira of female students every 6 months. Many other female students were present here who have expressed their desire to present the poetry of different poets on organizing the mushaira again.

PROGRAM REPORT

Program name : Webinar on Animal Behaviour.
Date of activity : 27/08/2022
Venue : Online.
Organized by : Department of Zoology.
Number of participants : 67

Objective of the program

Animal behaviour is the study of how animals interact with one another, move through their environment, learn about it, and possibly develop a cognitive grasp of it. Since early human existence depended on understanding animal behaviour, early humans probably first watched animals for practical reasons. Success needed thorough familiarity with an animal's routines, whether it be for hunting, maintaining domestic animals, or avoiding an approaching predator. Animal behaviour research continues to be very important today.

Topics Covered:

- Understanding and Adapting to the Environment.
- Locating Food.
- Defending their territory.
- Social hierarchy.
- Mating rituals.
- Adjusting to human encroachment.

MEMORANDUM OF UNDERSTANDING

This memorandum of understanding is entered between **ANWARUL ULOOM COLLEGE (AUTONOMOUS)** on this November 01, 2021, by and between **Department of Nutrition & Dietetics** having its campus at **New Mallepally, Hyderabad** (herein after referred as **THE COLLEGE**) which expression shall unless repugnant to the context or meaning thereof be deemed to include its successors and assigns of the **FIRST PART**

AND

GLOBAL MEDICAL EDUCATION AND RESEARCH FOUNDATION (GMERF), having a principal place of business at **GLOBAL TOWERS, 6-1-82/83, Lakdikapul, Hyderabad 500 004, India** (here in after referred to as "**GMERF**") which expression shall unless repugnant to the context or meaning thereof be deemed to include its successors and assigns of the **SECOND PART**

For facilitating

COLLABORATIVE ACADEMIC, TRAINING AND RESEARCH PROGRAMS IN THE AREAS OF NUTRITION & DIETETICS.

THE ANWARUL ULOOM COLLEGE (AUTONOMOUS), is established and administered by the Anwarul Uloom Educational Association (name of management) as an autonomous college under Osmania University Hyderabad.

THE COLLEGE had been benefiting from the expertise and facilities available at various National laboratories, academic institutes in and around Hyderabad through extension lectures, guest faculty appointments and training of students for project work.

GMERF is a not-for-profit organization having its own R & D and training centre which is recognized by Department of Scientific & Industrial Research (DSIR) pursuing research and training in the areas of modern medical biotechnology particularly applied in the areas of diagnostics and therapeutics.

In view of synergy in the objectives of the two organizations, it is desirable that THE COLLEGE and GMERF enter into a Memorandum of Understanding (**MoU**) for making available the expertise and facilities existing in both the organizations for promoting training, academics and research in the fields of common interest within the framework of charter of both the institutions for an initial period of **3 years** beginning from the Academic year 2021.

In accordance with a mutual desire to promote co-operation, THE COLLEGE and GMERF enter into this formal statement of collaboration, for the purpose of collaboration in educational, research and training endeavors.

THE COLLEGE and GMERF have found it mutually beneficial to seriously explore co-operative activities for the following purpose.

1. Exchange of faculty and staff for teaching and / or research assignments.
2. Training of students in research through internships and research projects.

PROGRAM REPORT

Program Name : cryptography technology.
Date : 20-11 - 2021.
Target audience : All Computer Science and Computer Science & Engineering
Venue : Computer Dept.
Organized By : Dept. of computer science & Engineering
Number of Participants: 40

OBJECTIVE

Cryptography is the practice and the study of concealing the information and it furnishes confidentiality, integrity, and exactness. Cryptography is used to defend the data and to defend the data and to define it in the simple and easy words, it is an art of writing and solving the codes. Cryptography is a science that uses the mathematics to encrypt and decrypt the information; it empowers to save the sensitive data. This feature of cryptography provides security and makes only the aimed recipient to read the data. The main purpose of cryptography is to defend the transmitted information and it plays an important role

- Authentication
- Data confidentiality
- Data integrity
- Non-repudiation

SESSION : 20-11 - 2021.

Brief profile:

She is currently working as Asst. Professor in the Department of Computer Science and Engineering, Visakha Institute of Engineering and Technology.

Outcome:

The participants are able to understand

- We use different types of algorithms to establish security services in different service mechanisms.
- We use either private key cryptography or public key cryptography according to requirement.
- If we want to send message quickly we use private key algorithm and if we want to send messages secretly we use public key algorithm.
