ABOUT THE COURSE

TAJWEED

The Arabic word Tajweed is derived from its root word "j-w-d" which means to make well, make better or to improve. The set of rules governing the way in which the word of Quran should be pronounced during its recitation. Tajweed is a very common term in the context of Quran recitation it comes from linguistically means enhancement or making something outstand. Learning of Tajweed is Very important because the Holy Quran is the speech of Almighty Allah , a divine message mercy and guidance from Allah to all humanity .it contains Knowledge rules and recommendation about all aspects of life and references to the hereafter. So It is very important to recite Quran with Tajweed to avoid mistakes in pronouncing words of Allah.

Objectives of the program

The M.Sc. I-year students in this programme were chosen explicitly since they deal with a taxonomy covering many plant species. Students learn about the different bioactive components present in the different plant extracts. The students from all academic streams who attended the 8-day course on phytochemicals found it to be highly engaging, educational and motivating. This course helps the learners learn about the different secondary metabolites and the bioactive components in the different plant parts. The course aims to achieve the following objectives.

- The purpose of this course is to make the students understand the importance of phytochemical (plant-based chemicals)
- To emphasize the importance and structure of phytochemicals
- To understand the uses of phytochemical nutrients in maintaining good health

## Program report

**Name of the Program** : Careers in Science  
**Dates** : 16<sup>th</sup> Aug 2022 to 25<sup>th</sup> Aug 2022

### Details of the resource person

**Name:** Dr. Majid Mohiuddin

M.Sc. (Microbiology), (Ph.D.)

Designation: HOD, Microbiology department

Institution: Anwarul Uloom College

### Objectives of the program

The value-added course on "**Careers in Plant Sciences**" was very successful as the students from science backgrounds were enthusiastic about attending this informative course. Dr. Majid started the session with an introduction to the "**Careers In Plant Sciences.**" He explained the importance of Microbiology in day-to-day life. He also suggested specific web portals of science and gave information regarding the application of plant science in research

He recommended numerous paths for a successful future. As they learn about the new science courses that enable them to pursue fulfilling occupations in their lives, students' responses have generally been positive.

1. To create awareness among the students about their future career
2. To develop the student's career employability skills
3. Students should know about the skill development cell-oriented course

### About The College

Anwarul Uloom College New Mallepally Hyderabad is one of the largest autonomous institution affiliated to Osmania University. The college had been accredited by NAAC with A grade. The college is contributed to create awareness among young minds towards global issues and is an excellent platform for the future of young aspiring minds. The college is one of the oldest and most prestigious muslim minority institution of higher education not only in Telangana State but also in India.

### About The DEPT of Botany

The department Botany had its inception in the year 1964 and become full fledged as under Graduate Centre in 1981. The staff of the department has have innovative teaching and research abilities. The department has been updating the curriculum and have introduced the choice based credit system (CBCS). The legendary department has national recognition because of the dynamic contribution of our talented faculty members.

### About The Course

Organic farming, agricultural system that uses ecologically based pest controls and biological fertilizers derived largely from animal and plant wastes and nitrogen-fixing cover crops. Modern organic farming was developed as a response to the environmental harm caused by the use of chemical pesticides and synthetic fertilizers in conventional agriculture, and it has numerous ecological benefits.

5HRS / Week

5 Credits

Syllabus- Sem I

Unit I: Concept of Organic Farming

- 1 Introduction. Farming, organic farming, Scope, concept and development of organic farming
- 2 Principles of organic farming & Need for organic farming, Requirements for organic farming, Farm components for an organic farm

Unit -II

- 3 Types of organic farming, Biodynamic farming, Benefits of organic farming  
Conventional farming and organic farming Organic Farming , Concept of farming ,  
Developing organic farms , Important steps & methods

Unit III: Organic Plant Nutrient Management

- 4 Organic farming systems, Soil tillage, crop rotation multiple and cropping systems, intercropping
5. Propagation-seed, planting materials and seed treatments, Bio-fertilizers-methods of application

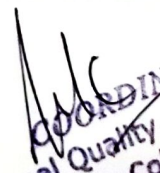

Unit IV : Vermicomposting

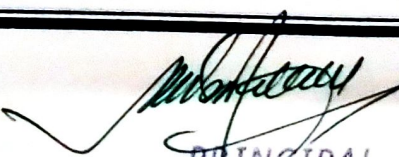

6. Water management, Green manuring, Composting & Composting methods, Vermicomposting, Pheromones, Bulky organic manures Concentrated organic manures, Organic amendments and sludges, biogas

Harmful effects of chemical dependant farming

Unit V: Organic Plant Protection

- 7 Plant protection- cultural, Plant protection - mechanical, Biopesticides
- 8 Plant protection- botanical pesticides I, botanical pesticides II, botanical pesticides III
- 9 Plant protection- biocontrol agents, Weed Management

### Objectives of the program

This course is intended for Masters's students because they work with plants while earning their degrees, and it can help them comprehend the idea of organic farming, the techniques used in it, and how they apply to various plants. In addition to safeguarding the environment and public health, organic farming has several advantages over conventional farming. These include enhancing soil fertility, improving water quality, preventing soil erosion, creating rural jobs, etc.

### Topics covered

- Introduction
- Principles of organic farming
- Types of organic farming
- Organic plant nutrient management
- Vermicomposting
- Organic plant protection

### Learning outcomes

- Source of employment
- Organic farming can sequester carbon in the soil, which helps reduce the greenhouse effect and global warming.
- Organic farming uses less non-renewable energy by using fewer agrochemicals.

Number of participants : 18

### Objective of the program

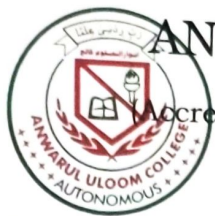

Analytical chemistry is a branch of chemistry that deals with the chemical composition of a sample as well as its qualitative and quantitative measurement. This discipline is concerned with general knowledge related to the use of analytical instruments and analysis of experimental data. It aims to fill the industry-academic gap in the students. It also helps the students learn and be prepared for industry related work.

### Topics Covered:

- Introduction to Analytical Chemistry.
- Equipment used for chemical analysis.
- Different techniques.
- Preparation and analysis of the sample.

## PROGRAM REPORT

Program name : Computer Aided Drug Design  
Duration Of Course : 10/11/2022 – 11/02/2023  
Venue : Chemistry Department  
Organized by : Department of Chemistry.  
Number of participants : 24

### Objective of the program

Computer Aided Drug Designing is a field of chemistry that employs computer to study and design new drugs in pharmaceutical industries. The course provides an in-depth knowledge of methods with essential hands on experience in CADD. It aims to fill the industry-academic gap in the students. It also helps the students learn and be prepared for industry related work.

### Topics Covered:

- Introduction to Drugs and CADD
- Molecular property predictions
- Molecular Docking
- Ligand-protein interactions
- QSAR
- Virtual Screening
- Chemo informatics

## Outcome of the program

This program proved to be successful as all of the participants found it interesting and inspiring since they got to learn about latest approach towards chemistry and how it is utilized in the pharmaceutical industries in this day and age. It allowed the students to get hands on experience on how to use CADD related softwares from Industry professionals. 24 Students completed the course Successfully.

## PROGRAMME REPORT

Name of the Program : Calligraphy  
Date : June 2022 to March 2023  
Faculty Name : Amtul Mujeeb Madiha

### **Introduction:**

Calligraphy from Greek is a visual art related to writing. It is the design and execution of lettering with a pen, ink brush, or other writing instrument.

Modern Calligraphy ranges from functional inscriptions and designs to fine – art pieces where the letters may or may not be readable.

Calligraphy continues to flourish in the forms of wedding invitations and event invitations, font design and topography.

It also used for props and moving images for films and television.

### **Objectives:**

- Students will develop their hand writing skills with a special emphasis on hand movements.
- The course will enable students to develop confidence as they learn more and more techniques.
- Various parts of the course will foster students' personal development so as to allow them to be prepared to assume an active role in their communities.

### **Outcome of the course:**

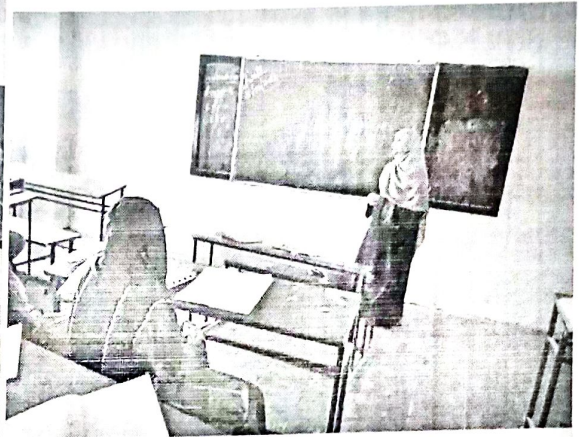

- **The course will help us to develop broader vocabulary and write text that are more comprehensive.**
- **It helps in moulding the functioning of your mind and changing our perspective.**
- **It helps in the development of new and complex neural pathways that helps in increasing the cognitive working of the brain.**
