PROGRAM REPORT

Program Name: Workshop on Mushroom Cultivation – Hands on experience

Date of activity: 18/12/2021

Venue: Anwarul Uloom College campus.

Organized by: Department of Microbiology

Number of the participant: 50

The department of microbiology, Anwarul uloom college had organized a "MUSHROOM CULTIVATION" Workshop for students and faculties on 18th December 2021 with motivation and support from management, Director and Principal of Anwarul Uloom College and Government Degree College, Begumpet, Hyderabad in collaboration with Government Degree College, Begumpet & Agro Monks, a Mushroom cultivation Organization, Lingampally, Hyderabad.

It was an integrated workshop where staff and students of Government Degree College, Begumpet had also collaborated and participated. The workshop took place in the Microbiology laboratory of Government Degree College. The participants acquired knowledge about Edible Mushrooms and complete detailed procedure for its cultivation. Each participant was given a chance to make their own bag of Mushroom Bed and inoculums like a giveaway token. The Hands on experience was very interesting method where learning by doing was adopted. Agro Monks trainer gave both theoretical and practical knowledge.

RESOURCE PERSONS:

Mr. K.S. Siddu
Agro Monks, Lingampally, Hyderabad

Objective of the Program:

- To give hands on training on Mushroom cultivation.
- To know the importance of Mushrooms
- To get the idea of Mushroom cultivation business.

Date: 27/08/2022

PROGRAM REPORT

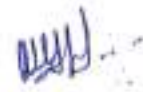

Program name : Webinar on Animal Behaviour.
Date of activity : 27/08/2022
Venue : Online.
Organized by : Department of Zoology.
Number of participants : 67

Objective of the program

Animal behaviour is the study of how animals interact with one another, move through their environment, learn about it, and possibly develop a cognitive grasp of it. Since early human existence depended on understanding animal behaviour, early humans probably first watched animals for practical reasons. Success needed thorough familiarity with an animal's routines, whether it be for hunting, maintaining domestic animals, or avoiding an approaching predator. Animal behaviour research continues to be very important today.

Topics Covered:

- Understanding and Adapting to the Environment.
- Locating Food.
- Defending their territory.
- Social hierarchy.
- Mating rituals.
- Adjusting to human encroachment.

The webinar was attended by a large no. of faculty members and students. There was a very enthusiastic participation by the students, which was evident by the number of questions asked. The webinar was conducted virtually using zoom app, link to which was mailed to the mail IDs of all the registered participants an hour before the webinar started. The webinar started at 1:00 PM and lasted till 3:00 PM on 27 August 2022.

This webinar taught the participants how different animals interact with each other and with their environment and how animals develop and identify patterns.

REPORT ON FREE HEALTH CAMP

ORGANIZED BY IQAC AND DEPARTMENT OF ZOOLOGY
IN COLLABORATION WITH KINGSTON HOSPITALS

As a service for the community and to educate students on the importance of regular health check-ups, IQAC and department of zoology organized a free health check-up camp with the help of Kingston Hospitals. It was organized on 00-00-0000 at 1:00pm to 6:00pm. Many doctors were present on site and provided facilities such as one to one consultation with the doctors, scanning and blood investigation.

ANWARUL ULOOM COLLEGE (AUTONOMOUS)

(Accredited by NAAC with 'A' Grade & An ISO 9001:2015 Certified Institution)

(Affiliated to Osmania University, Hyderabad)

Date: 24/08/2022

PROGRAM REPORT

Program name	: Webinar on Genes and Cellular control.
Date of activity	: 24/08/2022
Venue	: Online.
Organized by	: Department of Zoology.
Number of participants	: 75

Objective of the program

The tightly regulated on/off switching of a gene's expression is known as gene regulation. It controls the effective use of cellular resources in single-celled organisms in response to their environment. Gene control determines the cell, its form and function, and ultimately the entire organism in multicellular creatures. When their environment changes, such as in reaction to signals from other cells, cells can alter the pattern of genes they express. The beginning of RNA transcription is typically the most significant point of control for most genes, even if all of the processes involved in the expression of a gene can theoretically be controlled.

Topics Covered:

- Human genetic makeup.
- Types of genes.
- Chromosomal abnormalities.
- Hereditary genetic diseases.
- Gene mutations.
- Gene therapy.

Date: 24/08/2022

The webinar was attended by a large no. of faculty members and students. There was a very enthusiastic participation by the students, which was evident by the number of questions asked. The webinar was conducted virtually using zoom app, link to which was mailed to the mail IDs of all the registered participants an hour before the webinar started. The webinar started at 1:00 PM and lasted till 3:00 PM on 24 August 2022.

This webinar taught the participants about different aspects of Genes and cellular biology and that understanding the human genome is necessary.

MEMORANDUM OF UNDERSTANDING

DEPARTMENT OF ZOOLOGY, GDCW, HUSSAINIALAM

And

DEPARTMENT OF ZOOLOGY, ANWARUL ULOOM COLLEGE

Both the departments agree to examine the possibility of establishing a framework for educational and research cooperation for our students, faculty and staff.

In preparation for establishing a formal framework for future activities, the parties hereto agree as follows:

1. Exchange of faculty and staff for research, lectures and discussions which mutually benefit both institutions.
2. Collaboration for conduct of seminars, workshops and other projects.
3. Extension of advisory services as and when required.
4. Both the parties agree to cooperate in other activities of mutually beneficial

This Memorandum of Understanding is signed on 17-2-2022 and will be valid for three years, till 18-2-2025.

PROGRAM REPORT

Program name : Webinar on Laboratory Skills.
Date of activity : 25/08/2022
Venue : Online.
Organized by : Department of Zoology.
Number of participants : 82

Objective of the program

What do lab skills entail? Lab skills are the abilities you utilize in a laboratory, whether you're a professional researcher or a research student. Performing typical lab operations or analyzing samples are a couple of instances. Researching, analyzing, listening, communicating, and careful observation are all necessary lab abilities.

Topics Covered:

- What are laboratory skills?
- Punctuality.
- Keen observation.
- Following protocol.
- Affective communication.
- Data gathering.
